### **iiNet increases download limits**

Internet Service Provider (ISP) iiNet ([www.iinet.net.au](http://www.iinet.net.au)) increased the download limits for its high-speed ADSL plans during August.

All ADSL subscribers (those who receive their high-speed Internet over existing copper telephone wires) have received an increase in peak download limits by at least 50%.

Changes to billing procedures have also been introduced. Subscribers can now pay monthly if willing to use direct debit. However on the down side, you will now be required to pay a fee if you cancel within six months of signing up.
